

**Helping teams to
work better?**

**Missing good tools
to support team
development?**

Team Sociomapping®

What is Team Sociomapping?

- A toolkit using **landscape as metaphor** to show team's interaction in an easy-to-read way
- A new way to **constructively address** and facilitate team development
- **A team coaching** approach allowing your team to **find solutions** with fresh new insights

Why is it different?

- Team Sociomapping integrates 360°-like **feedback** with both **training** and **team building**
- Team Sociomapping is a truly team-based solution visualizing **team dynamics at one glance**
- Team Sociomapping combines **engaging** visualization with **a fact-based** approach
- Team Sociomapping makes even soft issues more **tangible** and therefore **easier to understand and solve**

When to use Team Sociomapping?

- Clients facing **teamwork-related issues**, e.g. need to improve communication, cooperation, decision-making, solve conflicts etc.
- Clients looking for **next level of performance** in your team, e.g. complex and demanding new project etc.
- Clients who need to **track and support changes** of teams, e.g. new members joining the team etc.

How it works?

- We provide the toolkit – you bring it to clients
- **Participants** fill in a short **20 minute online questionnaire** evaluating all team members
- **We** deliver **Team Sociomaps** and **Individual reports** to you
- **You** lead and facilitate a **development workshop** with the team to bring Sociomapping results into actionable changes
